Impianto frenante Brembo Brembo braking system

PINZE: forgiate in un unico pezzo, a pistoncini contrapposti e attacco radiale: una pinza innovativa che garantisce un'incredibile robustezza e rigidità.

DISCHI: flottanti per migliorare il contatto con la pastiglia, la dissipazione del calore e l'adattamento alle torsioni del telaio, migliorano la scorevolezza dell'assale.

POMPE: in alluminio forgiato, con serbatoio separato trasparente per permettere un controllo del liquido freni.

PASTIGLIE: disponibili sia in materiale organico che sinterizzato per soddisfare ogni esigenza in base alle condizioni d'impegno e alle preferenze del pilota.

In particolare sono disponibili due kit omologati per due tipologie di kart:

Kart 125cc: con cambio (125Shift) impianto frenante costituito da 2 dischi anteriori da 155mm con pinze a 2 pistoncini e pompa da 22mm e da 1 disco posteriore da 200mm con pinza a 4 pistoncini e pompa da 22mm con completo azionamento a pedale.

Kart 125cc: monomarcia (125KF) impianto frenante costituito dagli stessi componenti dell'impianto 125Shift, a parte la pompa anteriore che passa a un diametro di 14mm e comando manuale tramite leva dietro il volante, il diverso tubo anteriore a T e le pastiglie posteriori che di base vengono fornite in mescola sinterizzata.

CALIPER: forged in one piece, and radial piston opposite: an innovative terminal provides incredible strenght and rigidity.

DISCS: floating to improve contact with the tablet.

PUMPS: forged aluminum with transparent tank to check the brake fluid.

PADS: both organic material and sintered.

In particular, there are two kits approved for two types of kart:

125cc Kart: shift (125Shift), braking system consists of two 155 mm front discs with 2-piston calipers and 22mm pump and a 200 mm rear disc with 4 piston calipers and pump complete with 22 mm drive pedal.

125cc Kart: single speed (125KF) braking system consists of the same components 125Shift, apart from the front pump that goes to a diameter of 14mm and operated shift by a shift behind the steering wheel, the other T-tube front and rear brake pads provides the basic compound sintered.
